

Conférence Européenne
des Directeurs des Routes
Conference of European
Directors of Roads

This end-of-programme event will present the results of the three research projects funded under **CEDR Call 2013 Roads and Wildlife**: SAFEROAD, HARMONY and SafeBatPaths. These projects have developed recommendations for minimizing the effects of roads on wildlife, while optimizing the effectiveness of existing and newly developed mitigation measures. The workshop will present the projects' findings and recommendations, including a **Handbook on Roads and Wildlife** intended to complement the existing COST 341 Handbook.

The event will provide a platform for practitioners, experts and policy-makers to discuss these research results and their potential implementation in different countries across Europe.

Participation is free of charge. The conference language will be English.

Please, save the date!

More information about the conference program and a registration form will soon be available through our website. We will notify you when the website is online.
