

## First Announcement

## Final Seminar of COST 353 Winter Service Strategies for Increased European Road Safety Mai, 26<sup>th</sup> to Mai, 28<sup>th</sup> 2008 Dresden (Bad Schandau), Germany

COST 353 is a research project of 22 European countries dealing with winter maintenance strategies for increased road safety ([www.cost.esf.org/index.php?id=240&action\\_number=353](http://www.cost.esf.org/index.php?id=240&action_number=353), Chairman: Dr. Christian Holldorb, Karlsruhe/Germany, [christian.holldorb@holldorb-consult.de](mailto:christian.holldorb@holldorb-consult.de)).

At the Final Seminar there will be presented the results of this project, especially

- New and emerging technologies to be used for optimized winter maintenance
- Winter Maintenance Management Systems
- European level of service and winter maintenance model
- Actual and future research in winter maintenance

Beside this there will be given an overview of actual development and research in winter maintenance organization and technologies in Europe including the newest European standardization. There will be reports from several countries and the opportunity to exchange experiences

The Final Seminar will take place in Bad Schandau in the lovely valley of Elbe River in Eastern Germany near Dresden, a great historical town. There will be the opportunity to visit several places belonging to the world cultural heritage of UNESCO. ([www.dresden.de](http://www.dresden.de), [www.bad-schandau.de](http://www.bad-schandau.de))
